

NEW PRODUCT

Introducing the Birko Commercial Glue Board fly killer

Birko's commercial glue board fly killer is designed to be easy and quick to service, whilst offering a compact and slim aesthetic. With robust all metal construction, the unit is available as a slim white 30W wall / desk mounted product or a 60W double sided stainless steel model, suitable for ceiling suspension. Both products incorporate a unique swing open front that moves the tubes away from the large glue board area, allowing quick and simple glue board replacement.

All Birko Units are designed for use with genuine GLUPAC® pheromone impregnated glue boards, which incorporate UV stable dry glue for longer life and increased catch.

Benefits include:

All metal construction – Robust build quality

Unique swing open front guard and tube assembly – For quick and simple servicing

High efficacy UV tubes – Proven to be more effective and longer lasting than standard UV tubes

Large glue board with integrated 'debris tray' – Large glue area with horizontal section for insect debris collection

Common tubes and glue boards – Reduced inventory and consumable storage requirements

Wall or ceiling mounting options – Flexible product options

Independent certification – Independently tested and certified to RoHS and all relevant European and Australian standards

Complete peace of mind – One Year guarantee (Excluding tubes, glue boards and starters)

Part No.	Model	Dimensions(mm)	Coverage	Tubes	Weight
1004104	White 30 Watt	470x285x90	80m ²	2x15W	4kg
